Writing : Fluent

Work Experience

Please give details of any work you have undertaken, indicating whether full-time, part-time, vacation work or industrial training etc (most recent positions first).

Dates From - To : 01/01/2014-16/01/2014

Employer : • Process BMW car assembly lines, sub-assembly lines and electronic control. • Know more about inventory, quality management and Kaizen.

Responsibilities : BAG

Dates From - To : 14/08/2013-27/08/2014

Employer : • Identify different pressure, temperature, level and flow transmitter. • Investigate control valves, modulated & on-off control and HIPPS. • Get familiar with pumps, solids handling and material selection.

Responsibilities : Enppi

Dates From - To : 7/07/2013-06/08/2013

Employer : • Expose to international principles occupational safety and health. • Summarize 'Radiation Protection and the Management of Radioactive Waste in the Oil and Gas Industry'. • Research BOP, Christmas tree valves and fire protection system.

Responsibilities : Apach

Dates From - To : 16/06/2013-27/06/2013

Employer : • Operate in Cooker, washing machine, and water heaters production lines. • Learn about painting, types of presses, welding and maintenance.

Responsibilities : GMC

Dates From - To : 13/01/2013-24/01/2013

Employer : • Recognize different systems in diesel engine, turbocharger, and generators. • Gain Hands-on experience on diesel engine maintenance.

Responsibilities : AMI

Interests Activities

We are interested in what you do / have done outside your academic work.

Please record your non-academic interests and activities stating whether at school, college, university or elsewhere. Record any positions of responsibility you have held in any aspect of your life. (300 word limit imposed) *

As a Sabeel member, AUC • Research about scientific topics, make updates about new technologies. • Prepare for weekly sessions about scientific topics. As a Help Club member, AUC • Awareness team member Make a campaign about the constitution, and about our Islamic scientific heritage. • Computer Learning Committee Member Teach people ICDL modules. • Charity work Collect annual donations for Ramadan, Eid Ifar and Eid Al-Adha. Distributed these donations on the poor in Masr Al-adema vicinity.

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

I have visited Unilever factory during the Quest Experience Day. I found how professional the work in Unilever and how the factory pays a great attention to safety and environment issues. Besides, I was admired by the sustainability program Unilever aimed to achieved by 2020. Also, I have some friends how worked with Unilever in their thesis projects, and they told me how professional the management in Unilever, but they don't show us what they are doing according to confidentiality agreement. I have been in several industrial training and I didn't see a factory like Unilever.

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

when I was in training in Apache, I was asked to put recommendations about Safety, Health and Environmental issues for Apache sites. to be able to achieve this task, I had to read international documents about international regulations for the petroleum site field work. Also, I had several friends in petroleum engineering who have helped me in understanding of oil field operations beside my knowledge of geology.

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

it was in my academic life, where we were asked to design a mast lift. the mast lift is composed of different components which we didn't study throughout the course. To be able to make the design, I had to read about standards for the components. I downloaded different manuals for the mast lifts. I have to know new more features for drawing and modelling using solidworks. I was able to force analysis and motion study through solidworks. At the end, our design was the second best design and I got A in the course

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

it was the opportunity to start ICDL teaching activity in old Cairo through my participation with Help Club. That offers a great opportunity to poor people to take ICDL certificate freely. we faced several problems in that situation. we have to find a place there. we have to have modern computers for teaching. to solve these problems, we were able to contact NGOs in old Cairo to help us in finding a place and to find people who are willing to learn ICDL modules. we were able to teach the modules for 5 students. however, close to the end of the course, the students didn't attend for the last couple of lessons and they didn't complete the course. After that we decided not to complete as people are not committed enough to the lessons.

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

I started studying petroleum engineering and I found that petroleum engineering department is not well organized besides I didn't find it very interesting and I had decided to change major to mechanical engineering. the difficulties that I faced was is to convince my parents to do so, and I had to check my status with my scholarship office if they will allow me to do so or not. moreover, students with scholarships had to finish during 5 years. therefore, I had a plan to finish during 5 years through studying in summer and winter semesters. and I was able to convince my parents and scholarships office to allow me to change major.

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when.

If you have answered Exempted above, please specify the reason you were exempted.

exempted, I don't have brothers.

Do you have any health problems that could affect your future employment? If yes, please specify:

No

Do you have any relatives in Unilever NAME? If yes, please give details:

NO

Is there anything that has not been covered that you would like to mention? Are there any personal considerations that may be relevant to your application?

I had full governmental scholarship to study at AUC. My concentrations in mechanical engineering are mechatronics and power. I participated in AUC work study program three times during 3 normal classes. I worked in Rare Books sector in AUC library. I also participated in Alumni office for Direct Marketing Annual Fund/Fundraising.

Have you applied to Unilever before? If yes, what did you apply for:

Yes, for summer internship but I didn't make it to the interview stage. Also, I applied for the Quest competition and I attended the experience day.

Have you attended a Summer Internship in Unilever before? If yes, please provide details:

Year :

Line Manager Name :

Have you attended/participated in any event/activation held by Unilever in the last year (e.g. Lecture, workshop, competition)? If yes, please provide details

Event Name/Type : the Unilever experience day (The Quest)

Date: (MM/YY) : 11/13
