Interests Activities

We are interested in what you do / have done outside your academic work.

Please record your non-academic interests and activities stating whether at school, college, university or elsewhere. Record any positions of responsibility you have held in any aspect of your life. (300 word limit imposed) *

I played rugby representing the faculty of engineering team and was the team top try scorer I was one of the members of the HR team in the society of petroleum engineers student chapter in the faculty of engineering Alexandria university but I left due to family problems The most important responsibility for me is the girl which I chose to build my life with (promise) and I won't let go

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

My parents are the main reason for my journey at the faculty of engineering, they affected my life greatly, my fiancée too made me more active trying to find new ways of knowledge, and to start a good career with a good salary, so I started thinking of all the multinational firms and then I met a great person she was the HR girl responsible for the internship, she told me how to start a good career within Unilever and that this internship will be a very good start. about my efforts I tried hard to get an internship in another multinational firm like Schlumberger and Exxonmobile but I only got training in Kumatsu for heavy equipment.

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

The graduation project is the best example for this. we are not done with it yet but I had to make a lot of good relationships and contacts to help my team trying to find solution for every problem we faced. a) I tried to look at my contact list and call all the people I know asking about them first then trying to ask about someone who can help me with my task approximately every three contacts gave me a new phone number to call b) "Money Talks" but as we are not a rich project team so we had a problem with paying lots of money on our graduation project so we had to make use of every present material and person in our contact lists we used our relations in the college to help us do some work in the college workshop for free

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

I wanted to enlarge my C.V. horizontally as I am not ready for vertical enlargement yet so I tried more than one job that can help me in my future and in gaining experience in these new fields for me I tried network marketing, direct selling and now I work as a private teacher all of these jobs have nothing to do with my studies in Alexandria University Faculty of Engineering Mechanical Engineering Department

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

I will be honest in this in order not to lose my self respect here in Egypt nothing is like what it has to be if anyone try solve problems, work hard or even study and learn more his colleagues is being fought. I tried to do my job as a HR member in the SPE but the bylaws of the SPE were so restricted in this field and gave the opportunity to some kind of selfish guys (that never thought of the student chapter good) a lot of power and influence so they tried to block HR members from doing their work so I sent a resign to the president of the student chapter it was a good experience for me as to know the regime here in Egypt and how things are done

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

Entering the Faculty of Engineering was the hardest decision I took it took me 2 years in order to confirm that I will direct my career to the faculty of engineering and really it was a foolish decision.

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

I will have to complete my military service at the end of December 2014
