IEEE Alexandria Student Branch October 2012 – present Public Relations volunteer 1st place in Egyptian Science & Engineering Fair March, 2009 and 3rd place in ISEF Egypt March, 2010. Participated in the Intel International Science & Engineering Fair in Reno, Nevada, USA May, 2009 and in San Jose, California, USA on May, 2010 3rd place in the MSA science fair April, 2009. 1st place over Engineering Category in Bibliotheca Alexandrina Science and Engineering Fair March, 2010 3rd place in the Arab version of Intel Science Competition in Alexandria, Egypt on December, 2010. I was chosen among thirty of the best scout boys all over Egypt to participate in the Arab meeting for boys scout held in Portsaied, Egypt on July, 2004 & received the badge of computer, sports player, drawing and environmental friend.

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

I have joined the Quest by Unilever for the year 2013 and was chosen among the 100 from my college to experience Unilever day, along the day I have seen many people in different tracks HR, marketing and supply chain, very professional guys working in their tracks very devoted to their work this made me eager to join this place, the sessions within the Quest programme got me to understand the functions along with the help of a friend working at Unilever.

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

Last Summer I travelled with a group of my friends to the United States to work during our Summer holiday, this summer it was hard to find a job as the business in this town was very low though a friend of mine suggested a shop that was looking for a new guy to hire, my job was to convince people to buy, my boss taught me various selling techniques and he kept an eye on me to make sure I followed his instructions, I had to use every public skill I was taught from boys scouts at elementary school till being a Public relations person at IEEE AlexSB to keep my job which was all about convincing people. Making friendships with customers I just met along with being patient and helpful, learning to how to negotiate with people to get to the best bargain for the shop and the customer all of these together were the main aspects of my job.

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

During my highschool I joined a program at Bibliotheca Alexandrina, it was a science fair where students had to do a scientific project in one of the 17 categories including Engineering, for a school student that was a new challenge, with the help of a mentor I learnt a lot about electronics along with some main principles about engines and how they work so I can complete my project which was about controlling speed of cars, my project took the 1st place over Egypt and represented Egypt in an international science fair in USA, it also won the 3rd place over the Arab world in the Arab version of Intel Science competition.

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

After my 1st year at ISEF in 2009 I was participating again in 2010 but I felt I had a duty towards this place, I had to teach and help newcomers in their work so more students could learn what I have learnt. I gave sessions at schools like EGC about the competition and helped several students at their projects, even before the competition I participated with the experience I had from the past year in the sessions given to students about how to deal with the judge and how to write your research paper.

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

One night before the finals of the Arab competition the circuit I was working on totally stopped something went wrong with the programmed micro-controller and there was no time to make a new one. That was devastating as I had to represent Egypt and I don't have the practical part of my project. I had to go through this with the minimum losses I could. I made a new circuit which can only demonstrate the idea to help me with my presentation and tried as much I could to cover the missing part with photos and graphs instead of practical simulation and I still managed to get out with the 3rd place over the Arab World.

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

Exempted doesn't have any brothers

Do you have any health problems that could affect your future employment? If yes, please specify:
