These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

i faced alot of situations in my VOLUNTEERING EXPERIENCE in resala team we should choose the place which we will help them in the Humanitarian assistance convoy so we search in alexandria about places and i take decision about the final place. choosing based on the standards and expertise. then we go to there and explore the poor families to differentiate from them in Scale poverty from (0 to 10) and take decision about them after our choosing , i decide for every family what we will help them (Cooker- washing machine- building roof- connecting link w ater...)then Work a feasibility study about the prices and our budget (budget about 100000 LE) then Divide the tasks on leaders like Advertising and marketing to drive more donations and volunteers, purchase and shipment of aids etc so now we can go to there and spend only one day with 250 volunteers and Distributed our aids to improve their life. I participated in fresh connection supply chain competition with my classmates . every one of us had role , my role was Vice President of Purchasing after submit in round 1 I got a first place in the purchasing role in competition but unfortunately, our team got 33 place really this competition was helpful in my career

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

every convoy i talk with alot of students to persuade them to Volunteer with us for one day in the convoy ,and talk with people to persuade them to drive more donations . we make marketing at least for one week with flyers, banners and with events on facebook We target double the number of volunteers and take thier contact To communicate with them if happen any changing. we communicate with Transportation companies to provide buses to transport volunteers. now we get the volunteers and buses the last thing which is to identify the volunteers and defined what they do in the convoy. i talk with all volunteers in the morning of convoy day to raise the of morale, teamwork and confirm of importance of what they will do in this day

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

when i started in volunteerism Precisely starting resala team in faculty,i had to be good leader to lead the members and learn them the teamwork . i learned from observe previous positions that i saw and reading Books to teach Leadership i watched alot of programs and videos on youtube to teach my self when i learned something i try a shot to improve my character after each mistake , analyze the situation and think in my mistake, what should i do and shouldn't do ... and search in youtube and google about solution for my mistake. i found the best way to teaching my self is reading and try and error now i touch the development in my self and iam working in myself to be intelligent in my dealings

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

i participated in competition for the world in the future and exactly by 2050. my thinking was in the power source now we have Now we use oil in our daily lives, but after 50 years or less sources of oil will be implemented Therefore we should think from now on a new source of energy will be available and clean Its biodiesel can be extracted from converting plastic by chemical process Biodiesel is very clean and can be used as fuel for cars and help us get rid of the excess plastic as it creates many job opportunities and help in the generation of electricity and we can make new products like sandstone by which we get a new industry and jobs if you want more understanding our idea , watch our video in competition <http://www.youtube.com/watch?v=bsblcLc8zRY&feature=youtu.be>

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

when i was chairman of resala team i faced problems between the volunteers during events one of these problems, gray areas in leaders tasks in events that lead to a complex problems, so we must find radical solution the Radical solution was writing list of rules that define the tasks for every one in team and manage Punishments i had meeting with team leaders and discuss about every thing in volunteers and events then wrote the rules that help us and reduce problems when we finished it , we send it to Student Union to say if any rule was false then the team vote on it in meeting the result was 88% accept the list of rules.

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

the next year i will know

Do you have any health problems that could affect your future employment? If yes, please specify:

no
