Interests Activities

We are interested in what you do / have done outside your academic work.

Please record your non-academic interests and activities stating whether at school, college, university or elsewhere. Record any positions of responsibility you have held in any aspect of your life. (300 word limit imposed) *

OK, when i was in school i used to be Vice-Captain for my class in-order not to make any disturbance and if there was any problem i used to discuss it with our teacher to solve it in College i have joined IEEE " Institute of Electrical and Electronic Engineer " since 2012 , in 2012 i was a volunteer in 3 committees (HR, Membership-Development Committee & Reporting and publication), in 2013 i became head and now i am still current volunteers

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

First of all , i will tell you about people who stopped me from the beginning of my college life , when i decided to choose Mechanical department as i do like this field but my parents agree but i insisted to choose this department as i always see myself in a management position in a mechanical field , after that i felt that i knew mechanical people improved their skills , so that i looked for something to improve my non-technical skills , and challenged people who were seeing me that i can't do anything but i became head , responsible for more than 20 person and i added value. At this point i decided to be in something looks like this position which looks like Unilever

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

one of the most things i thought for it, that i found that most of fresh graduates don't know how to make a professional CV and to pass any HR interview and what their department needs after graduate , so i became a candidate in team. First of all we put a plan which was making simulation for the CV & interview by getting HR speaker from an entity must be professional and for the workshop i thought of sharing the old IEEE people who are working in different companies so we can share their valuable experience and an expert person in CV writing , not only these categories but there was also a session talking about start-up and how can anyone make his own start-up and when and the last session was about the non-technical position i achieved my task by presenting our plan to the volunteers who will help in making this plan happen

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

every summer i used to develop my technical skills as i found that my college gives us basics only which we have to cooperate with the outside needs , so that i took inventor course for a week , Solid work and Mat-lab. i took those because they consider them from the most common programs are used in many companies through their work , and the result on me was adding technical skills , and on others was helping them by making these courses in IEEE but not expensive like in any center. That was a great change for me and others

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

when i decided to be a head , i just wanted to add something new and valuable. That was the main reason which made me insist to be a head in the Membership development committee in IEEE, this plan was being professional in our work by using google form instead of excel sheets , and for the volunteers i proved to them that they can do anything whether it was difficult or easy to them , i also succeeded in growing up the spirit between them to give a professional output another thing when i participated in something like workshop for young students who didn't enter college yet , i used to help them to make a real robot by giving them mechanical information and what components they need , the result was they have gained an experience and tried to make robot by themselves

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

During my head position last year , there were lots of things happening in our country but we didn't stop working as our scope is helping student engineers , once upon a time i had received a mail before the task " desk task" about 1 hour that there was shooting behind the college and i have to take a decision whether cancelling or not , and if i will cancel how can those who were coming will register for the event. so i decided that we can have an online form for them as we will risk by their life and this decision was effective

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

I'm a female :)

Do you have any health problems that could affect your future employment? If yes, please specify:

No

Do you have any relatives in Unilever NAME? If yes, please give details:

No

Is there anything that has not been covered that you would like to mention? Are there any personal considerations that may be relevant to your application?

Have you applied to Unilever before? If yes, what did you apply for:

No

Have you attended a Summer Internship in Unilever before? If yes, please provide details:

Year :

Line Manager Name :

Have you attended/participated in any event/activation held by Unilever in the last year (e.g. Lecture, workshop, competition)? If yes, please provide details

Have you attended/participated in any activity held by other companies in the last year (e.g. internship, competition, workshop etc)? If yes, please specify
