Personal Details

First Name : Amr**Last Name** : Khalil**Nationality** : egyptian**Second Nationality (optional)** :**Age Range** : 20-23**Gender** : Male

Address

Primary Address

Address Line 1 : 13 zaki rabg st. smouha**Town / City:*** : Alexandria**Country** : Egypt**Email Address** : amrkhalil408@gmail.com**Unavailable interview dates** : 04/17/2014,04/27/2014,04/28/2014,04/29/2014,04/30/2014,04/25/2014,04/24/2014,04/23/2014,04/22/2014

Career Choice

Business unit : Mashreq**Function choice** : Engineering & Manufacturing**Second Function Choice** : Marketing

Further Education

University : Alexandria University**Faculty** : Engineering**Major / Department** : Electrical engineering**Graduation Year** : 2016**Degree/GPA** : 70 %

Secondary Education

School Name : *Zaharan language school**Dates From - To** : * 09/01/2008 - 06/30/2010**High School Certificate** : *Thanw ya Amma

Language Competency

English

Comprehension : Fluent**Speaking** : Fluent**Writing** : Fluent

Arabic

Comprehension : Fluent

Speaking : Fluent

Writing : Fluent

french

Comprehension : Basic

Speaking : Basic

Writing : Basic

Work Experience

Please give details of any work you have undertaken, indicating whether full-time, part-time, vacation work or industrial training etc (most recent positions first).

Dates From - To : 09/01/2013 - 09/01/2013

Employer : MIA robotics team roV sub team

Responsibilities : electrical engineering

Interests Activities

We are interested in what you do / have done outside your academic work.

Please record your non-academic interests and activities stating whether at school, college, university or elsewhere. Record any positions of responsibility you have held in any aspect of your life. (300 word limit imposed) *

I am a student in the [Bachelor of Electrical Engineering, Power and automatic control] [Alexandria University, Egypt]. I'm seeking a training/Internship, willing to join a well-established company and obtain an experience before graduation that allows me to utilize my knowledge, experiences and skills, share its success and grant it all my efforts. I have a good experience in the robotics field, I was awarded the Second place in the Mate ROV Egyptian Regional competition which was held at Arab Academy for Science and High Technology and Maritime Transport with participation of 35 teams from all over Egypt. Our Team was qualified to the 13th annual MATE international competition that is going to take place June 24-28, 2014 at the Thunder Bay National Marine Sanctuary in Alpena, MI, USA. (The ROV is a remotely operated underwater tethered vehicle). Moreover I have a good experience in *

Computer OS: Windows. • Illumination Analysis: DiaLux. • Microcontrollers: Arduino, AVR. • Circuit Simulation: Multisim, Proteus, Eagle (PCB designing) • 3D Design: Autodesk Inventor. • Programming: C/C++, Matlab. I also have a various significant experience in volunteering work such as • Volunteer in marketing committee IEEE Alexsb [The largest IEEE student branch in Region 8 (Europe, Middle-east and Africa) for the year 2008 and 2009. And Second largest branch worldwide]. • Volunteer in Public relations committee SPE (Society of petroleum for engineers). • Head of organizers MEPCON '12 (the premium Middle East conference on technological progress in all aspects of electrical power and energy systems). • Charity work (RESALA). • SPE leadership development program • I was from the 100 students which they were accepted in UNILEVER Quest challenge

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

MY answer for the first question: I think my father had a great influence at me, as he always encouraged me to enter the electrical power field, I didn't know why but he always was saying that electrical power is the base of electric engineering and everything in our world, I started to enter robotics competition at early age, and I established some success which made me to love this field to discover more and more about it. MY answer for the second question : when I entered the college I discover by the time that studying is not everything and should not be only goal, as linking engineering with management is the best way for me, so I decided to reinforce my skills in management, I took several courses online and in real life, worked as a volunteer for the two of the biggest NGOs in Alexandria university (IEEE and (SPE society of petroleum engineers)) and worked in marketing committee and PR committee, more over I was one of the chosen volunteers in SPE who were qualified to have online Leadership program of SPE international

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

We have made a technical organization in Alexandria University and we were awarded the Second place in the Mate ROV Egyptian Regional competition Our Team was qualified to the 13th annual MATE international competition that is going to take place MI, USA. (The ROV is a remotely operated underwater tethered vehicle). The competition do not offer us the tickets to USA and only offers us the accommodation, so we had to look for a sponsorship to offer us the tickets in this little time, I divided our teams into groups and each group is responsible for a specific task, at this time my contacts to the companies was not good at all and I had to get phone no and email, so what I have done is that I learned to use Linked IN and connected to the head of PR in IEEE as they are having experience in this field and I have done my best.

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

I have been in this situation many times, as I mentioned before me and my friends established a robotics team in the faculty and our experienced wasn't that strong to achieve first places in any competition especially that we have no reference (professor), so we have decided to start learn online in another meaning self-learning, and we have really established our goal and won the second place in Egypt in the biggest competition in the world in this field, another situations is that I have heard about the NANO-tech science and I didn't know what it is, I also have know n that it would provide the humanity a great unique solution so I decided to get enrolled in an online course, and I made what I wanted and completed my course from Rice University Nanotechnology: The Basics (online course – COURSERA.org), and received a certificate for that achievement.

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

Our team MIA has entered the competition of the ROV, in 7/3/2014, and to enter this competition you have to pass three phases, unfortunately we had a lack of luck, In the first phase we everything went wrong with starting from the robot till the place we were going to test in, but thanks that we passed it, In the second phase it was a local competition between the Alexandria university teams to be represent the university, what happened is that in this competition we were ready before it and everything was alright, but suddenly without any warning the ROV is not working, in the field we maintained the roV till the last minute and every team lost the hope to be qualified but we encouraged each other and thanks to god we passed it, the worst situation was in the regional competition, we went there and we were sure about our work everything is alright till the moment of the match the robot is not working, in the first trial we got -15 points, at this time we knew that it was impossible to compete, we went home losing our hope and energy to work but we decided to never give up and kept working until a late time and thanks to god for the third time to went the competition and won the second place and qualified to USA international competition.

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

I was Head of organizers MEPCON '12 (the premium Middle East conference on technological progress in all aspects of electrical power and energy systems). It was in my second year in college when Dr. Nabil Abbasy head of the electrical department in Alexandria university asked the students to organize this event, then I offered to do this, the challenge was to build a team of volunteers in 2 weeks, give them tasks and divide them into teams, especially that in this event there were scientist from all over Egypt and foreign scientist also which means that everything should be in the perfect way, thanks to god I have done this in a professional way and we organized it and received good feedback from the attendees

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

Military Status : Fully Exempted

Do you have any health problems that could affect your future employment? If yes, please specify:

n/a

Do you have any relatives in Unilever NAME? If yes, please give details:

n/A

Is there anything that has not been covered that you would like to mention? Are there any personal considerations that may be relevant to your application?

n/a

Have you applied to Unilever before? If yes, what did you apply for:

n/a

Have you attended a Summer Internship in Unilever before? If yes, please provide details:

Year : n/a

Line Manager Name : n/a

Have you attended/participated in any event/activation held by Unilever in the last year (e.g. Lecture, workshop, competition)? If yes, please provide details

Event Name/Type : Unilever Quest challenge

Date: (MM/YY) : 10/13

Event Name/Type : ROV competition

Date: (MM/YY) : 03/14

Have you attended/participated in any activity held by other companies in the last year (e.g. internship, competition, workshop etc)? If yes, please specify

Company Name : none

Event Name/Type : Unilever Quest challenge

Date: (MM/YY) : 10/13

Company Name : Arab academy for science and technology

Event Name/Type : ROV competition

Date: (MM/YY) : 03/14
