Both courses are at American Council Egypt. - Visited Fargalla Factory. - Visited AMOC (Alexandria Mineral Oils Company). - Visited Copper Company. - Visited Military Production Company. - Participated in The Engineering Awareness Campaign held for the high school students.

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

Many people talked with me about applying for Unilever as I think that I had a good background of marketing, time management as I am a creative and innovative person. I am about to apply to Unilever because it is one of the most famous international companies around the world with many brands. Moreover I would like to join its stuff for having the best opportunity, travelling abroad, dealing with many people and customers around the world.

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

a) I will make regular meetings for discussing our task, our ideas as well as, I will divide the main task into sub-tasks according to the qualifications of every member of the team and what he/she specified and interested in. After that I will follow their news and help them to achieve our task in the best way and at the best time interval. With the use of the social networks and mobiles I will use them to contact with all the team members when they are in different places to keep in touch and improving our sense of teamwork. b) I will influence them by giving them prizes and lead competitions between them in order not to lose our enthusiasm and to be always creative and improving our way of thinking. Furthermore, I will keep in touch

with the customers as they are the very important target to persuade and satisfy them.

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

I was put in a team in my department for making the final project to be submitted to the professor in order to have our year works marks. As I was elected to be the leader of the presentation and IT branch. I worked very hard to do all my best, communicate with the members I lead in all the possible ways: making meetings, having phone calls as well as using the social network. I took benefit from that experience by having new techniques of working in a team, discussing more ideas, not to be a bossy leader and perfectionist, and always be on time and ready for any arguments and complaints. As a result I was honored to be a perfect leader with very creative ideas and also I was nominated to be the project manager.

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

I participated in the Engineering Awareness campaign which we, as university students, decided to go to the high school students and talk with them about their predicts in the future and for the students who wanted to enter faculty of engineering specially, why they wanted to join it, talk with them about the faculty's nature, their practical work after that and how there is a gap between what we learnt and what we face in the practical life. I saw that they began to discuss with us, and they seemed interested in what we were talking about. As it was my first time to participate in such a campaign like this, but I was very excited, and I felt that by our discussion we made difference to let them more aware of what they are going to face. Some insist on entering the faculty and began to improve themselves by getting higher degrees to enter it, and some knew that it wasn't their suitable choice.

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

Nothing faced me like that.

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

Exempted because I am a girl. And in our country, no military service for girls
