Interests Activities

We are interested in what you do / have done outside your academic work.

Please record your non-academic interests and activities stating whether at school, college, university or elsewhere. Record any positions of responsibility you have held in any aspect of your life. (300 word limit imposed) *

My main interest would be computer and reading as for extracurricular activities I haven't participated in any that worth mention

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

My overseas experience has exposed me to different management style than we have here in Egyptian organizations which have showed me that Egypt's main problem is management. I believe in management as a science and I'm passionate about it's theories and techniques that we don't apply here (of course I'm not talking about Unilever).reading about Talaat Harb achievements and his role in building an industrial empire for Egypt was so inspiring.

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

When I started working at Citigroup center, we used to work in pairs a rover and a controller. My controller was very "uncomfortable" with working with a middle eastern guy. He used to give me tasks without explaining how to do it. I had to stay over my shifts and work with the rovers from the other teams and learn how to preform my tasks. I had formed friendships with many of them. Some days I had to do 18 hrs shift in order to do that.

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

In AAST when i decided to change my major from Marketing and business Administration to E commerce, I found that the subjects we are studying only cover the basics for each technology which by far is less than what's required in the work place beside acing it, I had to look for external courses to develop myself and prepare myself for the work place I searched for online courses for subjects that relate to my work study and I have found an amazing website that offer an excellent collection of online course for website developing called "Lynda.com" and I have download a full set of all required subjects and currently doing my self study which really affected in my outcome in academic projects and hopefully ease my career pursue.

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

I don't think that I can claim I have changed the future of anything despite the different jobs I had. the tasks were pretty organized and well-thought. no direct important impact I think I made in any of my previous jobs unless advising management in Citigroup to upgrade to a better security card issuing system counts!

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

One of the toughest decisions I had to make was changing my major from Marketing to E commerce as I so fond with marketing and the people skills need to excel in such a career but in the same time I love computers and I think I'd enjoy an information technology career as much. I didn't know what to do so I literally ask everyone I know. I also asked T.A.s from both departments about their opinion in order to identify each career pros and cons. I also searched for available vacancies in the market for both careers. I took me a month to decide to follow a php developer career. I believe it was the right choice.

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

exempted because I'm the only son in my family

Do you have any health problems that could affect your future employment? If yes, please specify:
