These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

Actually i am looking for an internship in a well-known organisation in the field of mechanical engineering that utilizes my management skills, communication skills, data gathering and analysis skills, So i decided to apply for Unilever.

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

When i joined AIESEC CU, i was required to sign some contracts with different NGOs, so i used my previous experience with ENACTUS and my friends who are working with different NGOs to arrange meetings with different NGOs and i was able to sign the contract with them in a short time although i've been in AIESEC for only 1 month which made my leaders surprised and satisfied with my performance.

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

In 2013, an application for Project manager in IEEE CUSB was released and i decided to apply, but business planning was a must for applying for such a position, so i decided to search for online courses and references to learn about this, and finally i were able to build an extra-ordinary plan for the project but unfortunately some problems happened in the organization (IEEE CUSB) and the project was postponed.

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

Actually i can not remember any situation like this i was involved in.

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

When i was Innovation Challenge Team Leader at ENACTUS CU, there was a big problem that some of the members were not available and we had too short time, so i talked with every member to set on the exact number of members who are ready to be available and we put a plan together which made them involved in the project and finally reached our goal.
