Employer : Front office in access team that troubleshoots down 2G and 3G sites

Responsibilities : Internship at Vodafone

Interests Activities

We are interested in what you do / have done outside your academic work.

Please record your non-academic interests and activities stating whether at school, college, university or elsewhere. Record any positions of responsibility you have held in any aspect of your life. (300 word limit imposed) *

Actually, all what I do since I was young is the sport. My day is divided between college and sport. Good for the body, good for the brain.

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

I am really obsessed with engineering, and it's really important for an engineer to have some management experience. Also, I spent the last five years in technical issues and projects and I think it's the time to relax my brain with this technical issues and to career shift and gain experience in another field.

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

I've got no example.

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

At first, I wasn't that good in programming. And there was an android application to be developed as a project. I developed myself by spending 2-4 hours daily on Google to enhance my programming skills. I was totally independent and I managed to finish the project before the deadline getting an excellent grade. Also, I made another project on android the following semester and my bachelor project was an android application and now I am one of the best developed in android platform in my colleges.

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

I haven't passed by this before.

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

Well, I am an engineer. I did a lot of projects and everyone of them was introduced as a complex situation. The best thing to accept this is to divide this to smaller parts and try to deal with this new situation. This could be compared with any situation in life. Once divided, it will always be simpler.

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

Do you have any health problems that could affect your future employment? If yes, please specify:
