Employer : As a junior teaching assistant I was responsible for assisting and aiding students through their computer science labs.

Responsibilities : German university in Cairo

Interests Activities

We are interested in what you do / have done outside your academic work.

Please record your non-academic interests and activities stating whether at school, college, university or elsewhere. Record any positions of responsibility you have held in any aspect of your life. (300 word limit imposed) *

During my school years I practiced volleyball till I became a team captain and then joined the national team and was awarded as the best blocker in Africa 2011. Moreover, during my university I joined many voluntary works but joining AIESEC GUC had the greatest impact on my life, personality and mindset and provided me with various skills as well as my first team leader experience outside of the sports field as a campus manager. I facilitated sessions in leadership, entrepreneurship, diversity and environmental sustainability for high school students. I became interested in computer science and advanced algorithms so I started practicing to join the ACM competition next year.

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices? (300 word limit imposed) *

My experience would be when I had a knee injury which disabled me from practicing volleyball. This experience was enlightening and probably was a critical point in my life especially because before it I so overrated myself and competencies, I discovered the real meaning of development and I figured out that I had a great potential to do more than sports and impact people and the society in a more direct, more responsible and more efficient manner. For the people I would pick my father who has been always trying to teach me what does leading by example mean.

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

-During my AIESEC GUC experience as a campus manager of IAET campus the new dean decided out of the blue that we won't be allowed to launch our campaign in the campus because of security reasons, the instability in the country and the nature of our job. a) I had some members in the IAET so we got the contact of the student union president we talked to the secretary of student activities we cleared out everything we managed to get to the dean afterwards. b) At this point as a team leader I had to be open for proposals of the members because they understood the campus reality more than me at this time as well as providing them with the why and the purpose of doing this.

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result? (300 word limit imposed) *

=After my second year in the university I decided to develop as much as I can to have my summer vacation exceptionally beneficial, so I decided to go on exchange and volunteer abroad. =I wanted to do this because me as a person driven by his sense of achievement. I believe that getting out of one's comfort zone is most effective and efficient way of development. -I went on exchange in the farthest country available. -The result was satisfying to a great extent I developed, learned and formed many international friendships.

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

-Before one of our volleyball championships the team was in one of our worst situations and teammates started losing hope of reaching anywhere in the competition. -As a captain I organized a team meeting with both of the coach and administrative responsible in order to review our needs as a team and discuss why people are demotivated. The obstacles are:- *Demotivated members *unsupported logistics by the administration. -After motivating ourselves and increasing training hours as well as the administration's support we managed to get to the third place with a very tight score to the first place.

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

During one of my university projects I faced a difficult bug in my code that threatened the whole project. I spent hours reading articles, research papers and searching for a proper solution for it. I changed the implementation of the core of the project which made it much more easier to solve the task.

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

Exempted because I have no brothers.

Do you have any health problems that could affect your future employment? If yes, please specify:
