These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

In 4 years of Working in Student Activity, I dealt with different kinds of People,I learned how to affect on them,how to communicate, to get out the maximum effort to accomplish the different Mission which we were asked for, I learned how to be leader not manager , How to use my team skills. I met the conceited people and got to know how to put them at a certain limit, the angry one and how to use his anger for the mission's sake. There are specific People who really played a great role in my life and affected on me in a great way. I think situations are the most effective teacher in my life which taught me a lot .

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

For example in the beginning of my work in update, we asked for making a documentation of all events that were held in the previous season, then make a recommendation letter and work analysis for this events, I had only one mate in my team, SO we divided the work between us, we had to make interviews with 4 leaders to be told every information about the events, we did start our work, I made my interviews with the leaders then I made a recommendation letter of the material used and from where can we get it , also the prices and who can help us in this kind of events. we discussed and mentioned the problems to avoid it in this year.

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

I am going to talk about IST (Inducing Scientific Thinking), I joined this activity after being a participant in their workshops for a year. Those guys changed me by 180 degree. I was such a university student seeks for girls and hanging out, and then I saw students at my age are affecting on the society, want to make a change in the community, want to make a progress in Egypt. I joined them to be one of them , to affect on others. to help and get learned from. My experience in IST is in ordinary one. I have changed because of them.

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

when I worked at Egyptian community for Engineering and Research, it's a new model in Faculty of Engineering , aims to make use of aluminum products to recycle it. I was in the technical team. I had to read a lot about this issue and how does it work , types of scraps and furnaces and how can we separate the garbage to get the Aluminum... unfortunately this project has stopped due to the lack of fund and human power.

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

When I was going to apply for HR head application, I had to make analysis of HR work in the previous period putting in my consideration all problems and obstacles we faced. Then I put suggested solution based on session I took in HR Management and my previous experience, then I put flow chart describe the process in a professional way, where I divide the committee into sub teams , each has a specific mission which helps the other team also.

General
