Interests Activities

We are interested in what you do / have done outside your academic work.

Please record your non-academic interests and activities stating whether at school, college, university or elsewhere. Record any positions of responsibility you have held in any aspect of your life. (300 word limit imposed) *

1. Mentor at Model of American Congress (Best mentoring team)(Bib. Alex) One of the most prestigious simulation models in Egypt. Being a mentor at the model of American congress meant that I not only had to be an academic facilitator making participants well aware of the American congress and contrasting with the Egyptian parliament, but also being a life coach, a role model and a friend 2. Coach at TEDx Alexandria 2014 (Bib. Alex) TEDx, x = independently organized event. In the spirit of ideas worth spreading, TEDx is a program of local, self-organized events that bring people together to share a TED-like experience. A coach at TEDx aims to help the speakers share their experiences in a convenient – rather catchy – approach helping the audience to get inspired . 3. Volunteer and Member at IEEE AlexSB (2013) Faculty of engineering Volunteer and Member at the institute of electrical and electronics

engineering (IEEE) giving me the privilege of not only having courses and academic enrichment but also helping others select their paths and take up technical courses

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

Having the privilege to work at the model of American congress helped me select the management career because I learned to work within a certain hierarchy having HRs ,PRs and QA units . During those 6 months I held several leadership positions , worked with different characters and discovered my ability to manage and impact others . I had several trainings on effective leadership and team building and I am very much looking forward to apply what I've learned and put it into action

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

One of the main aims of being a coach at TEDx is to set up a theme that is influential and grabs everyone's attention , for that a group assembly was held to set up certain criteria by which the theme will be chosen . I had the had the ability to moderate the talk and help my teammates brainstorm to bring out the best ideas possible . Organizing your thoughts and putting them into a certain well structured manner is a very important process

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

Stepping out your comfort zone is a statement usually said in civic society . My first initiative is deciding to not only focus on academic enrichment found in college (which is very important) but also start engaging into several beneficial activities and that's when I applied to Project Lighthouse as a Capacity building member which was a hot shot at the time given that I had no previous experience , the great obstacle at the time was my relatively high stage fright which , with the help of my teammates, eventually vanished by the end of the project giving me a life skill I wouldn't have had but for them

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

The orphanage I go to . I truly believe that childhood is the most important phase in life , it's where your personality is forged and your ethics are molded . Going to the orphanage every Friday gives me the chance to teach the kids one small lesson , trying my best to raise these kids upon certain ethics long lost in our society . The problem with kids is the inability to easily communicate with them and therefore whatever lesson taught should be given in a rather catchy , engaging way . For that I meet up with a group of friends to come up with catchy new workshops having a lesson behind them

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

Effective critical thinking involves analysis of problems , brainstorming for the best outcome solution and evaluating for the best solutions . We were asked during the summer of 2013 to build a quadcopter without using an essential component called the micro-controller. By searching in forums the job seemed to be almost impossible how ever by some creativity and very hard intense work the job was done with best possible outcome to the extent that the doctor himself didn't believe that it was made with such efficiency .

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

Required for military service after finishing college in 2016/2017
