Speaking : Basic

Writing : Basic

French

Comprehension : Basic

Speaking : Basic

Writing : Basic

Work Experience

Please give details of any work you have undertaken, indicating whether full-time, part-time, vacation work or industrial training etc (most recent positions first).

Dates From - To : 15/7/2012-8/7/2012

Employer : Wireline-Civil Engineer-Trainee

Responsibilities : Schlumberger Petroleum Service

Dates From - To : 7/7/2013-21/7/2013

Employer : Automatic Control Unit-Trainee

Responsibilities : ANRPC Petroleum Service-Oil Refining

Dates From - To : 7/11/2013-8/12/2013

Employer : Business Case Study-Team Vaseline

Responsibilities : Unilever Quest

Interests Activities

We are interested in what you do / have done outside your academic work.

Please record your non-academic interests and activities stating whether at school, college, university or elsewhere. Record any positions of responsibility you have held in any aspect of your life. (300 word limit imposed) *

First of all my academic work is within the engineering field especially the electrical and mechanical so relative to that, my non-academic interests and activities will be: -The Business Case Studies (Marketing-Supply Chain-Human Resources-Accounting-Research and Development) and this interest has been growing since the Unilever Quest 2013 -Social Civil & Volunteer work: Participation in the informal education models (Model of European Union (Step Up initiative) – Model of Euromed Partnership (Purple Development initiative)) [Alexandria Bibliothetheque] Participation in enhancing people lives (Sonaa el hiah-Resalah) In 2007 I participated as a representative of the Egyptian Delegate in the efficiencies of the international conference of Peace & Development for children in Amman-Jordan -Painting [Sporting Club & School] -Elocution [School] -Acting in Plays [School]

These questions tell us something about how you respond in challenging situations. Please answer them using examples from your experiences in academic, social or working life

1. Please tell us about experiences and people that have over time shaped your decision to consider a management career within Unilever and in your chosen function in particular. What efforts have you made to test out your choices?(300 word limit imposed) *

Unfortunately there is no one helped me to shape my decision in that issue but it is all about my passion for innovation and management in the field of business even I don't have a very much academic review in this field due to my different academic major which is engineering. Being along with the experience of "The Quest" I had tested myself and my skills in particular hard way, I have known that I can lead a team whatever its level was, I have known that I can start learning anything I want from the bottom but all what I need is motivation, I have known that I'm a non-quitting person even if I felt that I will not succeed because it is not about how much you hit, it is all about how much you got hit, and after all being a part of one of the most great international consumer goods company like Unilever is a privilege to anyone.

2. Using an example of a time when you were in a new environment and had to achieve a task, please describe a) how you established and used a network of contacts, and b) how you set about influencing people, to help you achieve your task. (500 word limit imposed) *

The life time experience was in The Quest where I had to deal with a business case study and double the turn over after three years which was a real challenge to me because at that time I didn't know anything about this field, actually I didn't start from the bottom, I started from the sub-bottom a) At first I was depending on my skills in self-learning, I knew that I can do it but the problem was that I needed much more time so as a team we started to talk to academic professors in other faculties and other people with real life business experience (business men) b) I started to talk with my friends (who are not part of the competition) about the case and I tried to make this case an interesting topic to talk about everyday to squeeze every single idea come up by chance. After all these friends are the consumers relative to me at that time

3. Tell us about an occasion when you have taken the initiative to learn and develop yourself in significantly new ways. Why did you want to do this, what did you do and what was the result?(300 word limit imposed) *

Actually as I mentioned the Quest was as one of the occasions that help me improve and develop myself in significantly new ways but I also have another occasions that meet the same criteria of the question like, I was trying from a while and still to learn German Language because I was looking forward to complete my Masters in the field of Engineering in Germany and it is essential to learn how to talk in German language to interact with the society easily because people there are a bit restricted with their mother tongue language. I have depended on my good skills in self-learning, I started to watch some videos on the You Tube channels, I started to download applications on my mobile like Duolingo App to help me in learning the language in any place or any time & that was pretty helpful & I also put a timetable to stick to for my online lessons. Now I am considered a beginner in this language and I can have a simple conversation with a person in German and I'm still working on it to reach the advance level and all of this was on my own & I am now preparing to have a placement test for level A.

4. Tell us about a time when you saw the opportunity to really make a difference for the future of an activity, team or organization. What did you do, what obstacles did you overcome, and what happened as a result? (300 word limit imposed) *

There once was an opportunity to make a good partnership company based on the idea of the Engineering Service specially serving students' graduation projects and improve the students by giving them lectures. The pillar of this idea was the 3D Printer which was able to print any kind of 3 Dimensional drawings on any CAD program using plastic as a raw material.

students by giving them lectures. The pilot of this idea was the 3D printer which was able to print any kind of 3 dimensional drawing on any CAD program using plastic as a raw material, and it would be a great breakthrough in the middle east because it was still unknown for most people. There was a lot of obstacles which was the lack of capital, the free time to manage the company and choosing the right partners. However all of these obstacles were solved but the only problem that stood still the military service of a lot of my partners which would make the company impossible to be managed in their absence & after a lot of discussions we weren't able to overcome this problem by any means at the time.

5. Tell us about a time when you have had to analyse and understand a complex situation in order to make decisions and put a plan into action. What did you do and what was the outcome? (300 word limit imposed) *

The Graduation Project. We first started with a brain storming to get as much ideas as we can and then we started to vote on the type of project we will establish, finally we reached to a decision as a team that the graduation project will be about an electric generator called Stirling Generator. I was charged unanimously to be the leader of the team of 12 members with an average academic and practical background; I had to judge the team due to my good experience in the engineering projects. First I started to make a plan to enhance and motivate the team towards the project; I pronounced that I will make an assessment test for each one of them about the details of the project, then we started to divide the members to 2 teams [Mechanical-Electrical] each with a head, then we started to study and design the engine and survey the market to find the right and the available materials and tools that we will need. Finally we made a prototype and the results were spectacular and now we are working on a bigger model with bigger output power.

General

Please give details of any military service requirements, with reasons for any exemptions claimed. If you have completed your military service please state when. If you have answered Exempted above, please specify the reason you were exempted.

I don't have a military service because I'm the only son of my father and mother, also my father is dead

Do you have any health problems that could affect your future employment? If yes, please specify:

No

Do you have any relatives in Unilever NAME? If yes, please give details:

No

Is there anything that has not been covered that you would like to mention? Are there any personal considerations that may be relevant to your application?

n/a

Have you applied to Unilever before? If yes, what did you apply for:

Yes, I have applied for Unilever The Quest last year "2013"

Have you attended a Summer Internship in Unilever before? If yes, please provide details:

Year :

Line Manager Name :

Have you attended/participated in any event/activation held by Unilever in the last year (e.g. Lecture, workshop, competition)? If yes, please provide details

Event Name/Type : Unilever The Quest

Date: (MM/YY) : 12/13

Have you attended/participated in any activity held by other companies in the last year (e.g. internship, competition, workshop etc)? If yes, please specify

Company Name : none

Event Name/Type : Unilever The Quest

Date: (MM/YY) : 12/13
